

Brackish Water RO MSB Series Pump & Energy Recovery

Provides best SEC
of any BWRO Pump
and Energy Recovery
Turbine Package

MSB Model Features

BWRO Feed Pump

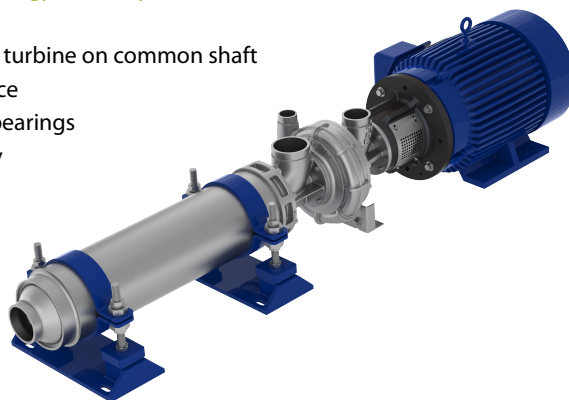

- high efficiency (to 81% efficiency)
- zero-scheduled maintenance
- small footprint
- thrust absorbed by pump bearings
- Water Bearing™ technology
- 316SS construction

Applications:
Feed Pump
Product Transfer Pump
Interstage Booster

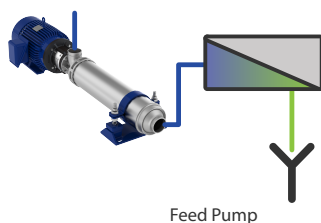

MSB-T Model Features

BWRO Pump and Integrated Energy Recovery Turbine

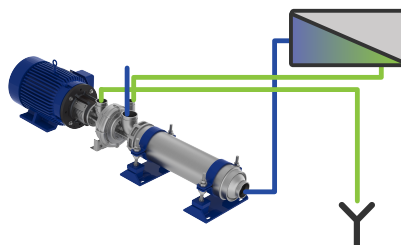

- high efficiency
- pump and energy recovery turbine on common shaft
- zero-scheduled maintenance
- thrust absorbed by pump bearings
- Water Bearing™ technology
- 316SS construction

Let no energy go to waste in your BWRO System

Feed Pump

Feed Pump with Energy Recovery Turbine

- Feed flows from 7.5 to 132 m³/h
- Brine flow from 10 to 80 m³/h
- Horizontal installation
- Pressures from up to 35 bar
- Manufactured by FEDCO in the USA
